

Inrico Showcases Next-Generation Secure Communication Solutions at PMRExpo 2025

Nov.26.2025

PMRExpo, Europe's leading trade fair for secure communications, continues to serve as a premier hub for innovation and knowledge exchange in mission- and business-critical communications. Bringing together users, providers, and industry decision-makers, the event offers valuable opportunities to explore emerging technologies and build meaningful partnerships. This year, Inrico presented its latest advancements, demonstrating how converged communication technologies are enabling the next generation of secure and intelligent connectivity.

Leading PTToc and Converged Communications Innovations

As a global leader in Push-to-Talk over Cellular (PTToC) and converged communication technologies, Inrico showcased its newest solutions to strong interest from visitors and partners. The company highlighted its commitment to delivering reliable, resilient, and scalable communications for both mission-critical and enterprise-critical environments.

Inrico provides a full suite of MCPTT, MCVideo, and MCData solutions designed for high reliability, low latency, and seamless connectivity. Optimized for industries such as public safety, manufacturing, utilities, and commercial operations, these intelligent and converged communication platforms help teams achieve real-time coordination, operational efficiency, and enhanced safety.

Secure Mobile Device Management System

Inrico's Mobile Device Management (MDM) system supports both remote and local deployment modes, strengthening device security and compliance while lowering maintenance and operational costs. With centralized, over-the-air management, IT teams can configure and secure radio devices, manage application installation and permissions, and enforce usage policies. The integrated App Store streamlines safe software deployment, protecting sensitive data and ensuring secure device operations across an organization.

Comprehensive Body-Worn Camera Solutions

To address challenges in multimedia evidence management — including cross-domain communication, fragmented data, and operational inefficiencies — Inrico introduced its unified body-worn camera (BWC) ecosystem. This end-to-end solution integrates PoC communication, real-time video, emergency alerts, digital evidence management, and command-and-control capabilities. Key functions include high-definition video recording, dual streaming, video dispatch, SOS alerts, multimedia messaging, and secure data handling. The system supports compliance-based workflows, reduces frontline burden, and enhances tactical command efficiency.

Product Highlights at PMRExpo 2025

[BC680 All-in-One Body-Worn Camera with PoC](#) is Inrico's newest all-in-one body-worn camera featuring integrated PoC communication. Key features include:

- 3W loudspeaker with AI noise cancellation
- One-touch switching and rapid video recording
- Peripheral connectivity for streamlined operations
- Simultaneous video calling and recording
- Clear audio capture up to 10 meters

The BC680 enables frontline teams to record critical moments in HD and securely transmit footage to command centers in real time.

[S350 — 5G Rugged Smart PoC Radio](#), 3GPP-compliant, combines smartphone usability with mission-critical reliability. Highlights include:

- 5G connectivity
- 3W speaker with AI noise reduction
- MIL-STD-810H rugged design with reinforced corners
- Fingerprint authentication
- Top-mounted microphone for clearer voice capture

It delivers secure, stable communication in demanding and unpredictable environments.

[S300Pro — Ultra-Rugged Smart PoC Radio](#), built for endurance, features:

- Integrated QR code scanner
- Oversized 6.5-inch HD sunlight-readable display
- 114 dB loud audio
- Massive 10,000 mAh battery for up to 50 hours of operation
- Bluetooth and NFC for task, personnel, and asset management

Its robust design supports productivity in logistics, industrial, and field operations.

Inrico extends its sincere appreciation to all visitors and partners who joined us at PMRExpo 2025. This year, we didn't just showcase products — we demonstrated our commitment to shaping the future of secure, intelligent, and converged communications. Together, we continue building a safer, smarter, and better-connected world.
