

# Inrico to Unveil Innovative Communication Solutions at CCW 2025

Jun.09.2025

Inrico, a world-leading provider of mission-critical and business-critical communication solutions, will unveil its latest innovations at Critical Communications World (CCW) 2025, taking place at Brussels Expo from 17–19 June 2025.

At this year's event, Inrico will highlight its expertise in critical communications, mobile device management (MDM), and body-worn camera solutions. The company will present a comprehensive suite of intelligent solutions tailored for frontline operations — encompassing converged communications, real-time location tracking, smart dispatch systems, and digital evidence management.

### Critical Communication Solution

Inrico provides secure and reliable MCX communication solutions, including MCPTT, MCVideo and MCData, featuring high reliability and convergence. It supports multi-media communication, real-time location tracking, patrol management, and incident alerts. With these advanced capabilities, the dispatch console ensures efficient and instantaneous coordination of frontline personnel, enabling rapid response and effective resolution of critical incidents.

### Body-worn Camera Solution

To address key challenges such as cross domain communication, data fragmentation, operational inefficiencies and security vulnerabilities, Inrico has developed a fully integrated end-to-end ecosystem. This solution combines PoC (Push-to-Talk over Cellular) intelligent communication, digital evidence management, and AI-powered analytics. It enables real-time video monitoring, emergency SOS, and digital evidence management, empowering law enforcement agencies to enhance operational efficiency, regulatory compliance, and risk mitigation during field execution.

### Mobile Device Management

The MDM solution offers centralized and scalable management for multi-mode radios and PoC terminals. It simplifies hardware configuration, system updates, remote control, and location tracking—enhancing data security and reducing IT workload. This enables teams to manage devices securely, efficiently, and with reduced operational cost.

“Inrico remains committed to empowering frontline professionals by delivering seamless connectivity, enhanced coordination, and accelerated decision-making, even in the most demanding environments.” Said Mr. Renxing Pan, CEO of Inrico. “These end-to-end solutions reflect our dedication to driving efficiency, reliability, and innovation in mission-critical communications.”

### A Glimpse of Flagship Solutions at CCW 2025

#### IRC380 Multi-Mode Smart Radio | Reliable Communication in Challenging Environments

Engineered for demanding missions, the [IRC380](#) features 5W transmission power and a durable antenna engineered to withstand forces of up to 30 kilograms, ensuring stable communication even in weak signals. Dual PTT buttons allow seamless switching between public and private networks, while the AI noise-cancellation microphone and noise-reduction chip ensure clear voice transmission for uninterrupted command and dispatch.

#### S350 5G Professional Smart Terminal | Optimized for Multi-Task Operations

The [S350](#) is Inrico's first 3GPP-compliant 5G terminal, blending the convenience of a smartphone with mission-critical voice dispatch capabilities. It features a 3W speaker with AI noise cancellation, MIL-STD-810H standards, and reinforced corners for enhanced durability. With fingerprint authentication and a top-mounted microphone, the S350 delivers secure, clear, and reliable communication in challenging environments.

#### IRC100 Multi-Functional RSM | Three-in-One Converged Communication Tool

[IRC100](#) integrates a PTTtoC device, palm microphone, and gateway in a single unit, ideal for patrol, dispatch and other tasks. It supports NFC clock-in, real-time positioning, dual mics with noise cancellation, and a convergent gateway that streamlines coordination between public and private networks, facilitating rapid deployment of temporary communication systems.

Building on the success of our participation at CCW 2024 in Dubai, where we engaged with industry leaders and global partners, we are pleased to return this year with an expanded portfolio of advanced solutions. We warmly invite you to visit us at **Booth K29** at **Brussels Expo**. Join us as we showcase our proven technologies and collaborate on shaping the future of converged critical communications.
