

Experience Innovation with Inrico at PMRExpo 2024

Nov.08.2024

As a global leader in Push-to-Talk over Cellular (PTToC) technology, Inrico is set to make an impactful presence at PMRExpo 2024. With the wireless communications sector shifting from private network communications to public network solutions, Inrico continues to lead the transformation by leveraging its pioneering innovations and robust technology.

This premier industry event will mark Inrico's final showcase of the year, setting the stage for the company's upcoming product releases in 2025. Inrico is poised to debut an advanced product lineup at PMRExpo, including several flagship devices introduced for the first time.

Key highlights will feature the [IRC590](#), a military-grade PTToC terminal, the 5G Smart PTToC Radio S350, and the [IRC380](#), an Intelligent Hybrid Radio with market-leading features like 5W transmission power and a one-click toolbox for enhanced safety. Another groundbreaking addition, the [IRC100](#) Hybrid Rugged Radio, combines Tetra, DMR, and P25 technologies, serving as both a narrowband handheld peripheral and a plug-n-play gateway for seamless private and public network interoperability.

Inrico will also showcase the [S300Pro](#) terminal, designed for logistics and warehousing with an integrated barcode scanner, along with the [T330/T338](#), high-end smart terminals developed to meet user needs. Attendees will have the exclusive opportunity to experience these prototypes firsthand.

Visit Inrico at **Booth C-025** to explore the superior performance of these innovative solutions.

Additionally, Inrico has partnered with [Mobile Tornado](#) for this event, featuring Mobile Tornado's PTX solution on Inrico devices. This collaboration will offer a fully integrated software and hardware solution, driving enhanced communication capabilities and operational efficiency for industry users.
